

Melissa Boudville

Software Developer

👤 Profile

Software Developer with 1 year of experience delivering innovative, user-centric solutions across **web and mobile platforms**. Proficient in **TypeScript, JavaScript, React, and React Native**, with a strong track record of building **scalable, high-performance applications**. Experienced in **Agile development environments**, collaborating closely with cross-functional teams to ensure seamless project delivery and continuous product refinement. Passionate about leveraging modern technologies to solve real-world problems and craft intuitive, impactful user experiences.

💼 Employment History

Frontend Engineer Intern at Ryt Bank, Kuala Lumpur

April 2025 — October 2025

- Developed and optimized fintech mobile applications with a focus on **user experience, performance, and feature reliability**.
- Delivered **199+ commits in 3 months**, contributing to key improvements in the bank's mobile platform.
- Created **proof of concepts (POCs)** for interactive **graph visualizations**, tackling challenges around **dynamic width and height** for responsive layouts.
- Built **reusable design system components**, ensuring consistent styling and behavior across the app.
- Integrated **analytics and user behavior tracking**, enabling data-driven decision-making for product enhancements.
- Collaborated closely with **product managers, backend engineers, and UI/UX designers** to deliver features aligned with business goals.
- Utilized **React Native** and **Expo** to ship production-ready features in an agile environment.

Software Development Engineer at ON2IT SDN BHD, Shah Alam

April 2024 — April 2025

- Developed and maintained **enterprise-grade solutions** for the GEBME project, enhancing both the **admin portal** and **point-of-sale (POS)** system features.
- Implemented and optimized core functionalities using **Spring MVC, Java, AngularJS**, and **HTML**, ensuring a seamless and responsive user experience.
- Led the **CI/CD pipeline setup** for POS system deployment, streamlining release cycles and improving deployment reliability and scalability.
- Executed end-to-end **implementation and rollout** of the GEBME POS system across multiple environments with a focus on uptime and fault tolerance.

Skills

Typecript

JavaScript

React

React Native

Java

C++

MySQL

Firebase Realtime Database

MongoDB

GitHub

Android Studio

Lua

Roblox Studio

- Worked closely with **cross-functional teams** in an **Agile/Scrum** environment, managing project tasks and progress through **Jira**.
- Collected and analyzed **user feedback**, driving iterative improvements that directly enhanced system usability and operational performance.

Undergraduate Intern at Dell Technologies, Cyberjaya

August 2023 — November 2023

- Resolved network outages by conducting **root cause analysis** and implementing corrective actions as part of **incident management**.
- Used tools like **ServiceNow**, **Cisco**, and **NetBrain** to track and manage incidents while maintaining compliance protocols.
- Collaborated with global teams to improve **infrastructure monitoring** and **SSH access reliability**.
- Created internal **documentation and training resources** to streamline incident resolution and support team operations.

Undergraduate Intern at myQuickHR Sdn. Bhd., Kuala Lumpur

January 2020 — March 2020

- Built **functional chat interfaces** using **Google Dialogflow**, enhancing real-time user engagement and support on client websites.
- Designed and developed **interactive e-learning modules** with **Articulate 360**, leveraging **text-to-speech** and **trigger-based logic** to deliver dynamic, accessible learning experiences.
- Executed thorough **testing and debugging** across mobile platforms, resulting in noticeable improvements in performance and reliability.
- Worked closely with **designers, product managers, and stakeholders** to gather requirements and deliver **user-focused solutions**.
- Continuously iterated on features based on **user feedback**, driving measurable increases in engagement and satisfaction.

🎓 Education

Bachelor of Computer Science (BCSSUT), Swinburne University of Technology, Subang Jaya

December 2023

- Built a full-featured **shopping system** using the **MERN stack** (**MongoDB, Express, React, Node.js**) as part of academic and personal development.
- Designed and implemented **item sorting by category and price**, focusing on enhancing **usability and customer experience**.
- Active member of the **TableTop Society**, fostering teamwork and strategic thinking outside of the classroom.

★ PROJECTS

INTI CarPark (Java, Android Studio)

Developed a car park reservation system featuring real-time updates, notifications, and a user-friendly interface using Firebase for database integration.

Link: [INTICarPark](#)

StarlingRNFAApp (Java, Android Studio)

Built a restaurant table reservation app with additional features for catering orders and feedback forms, integrating MySQL and PHP APIs for backend functionality.

Link: [StarlingRNFAApp](#)

Shopbuddies (MERN Stack)

Created an e-commerce platform with category-based sorting, cart and checkout features, and an admin panel for product management using React.js, Node.js, Express.js, and MongoDB. Bootstrap Project.

Link: [shopbuddies](#)

GEBME Web Portal (Spring MVC)

Developed a robust web portal for menu management, incorporating role-based access control, dynamic UI components, and seamless backend integration. Utilized Spring MVC for the backend and AngularJS for the frontend to manage store menus efficiently. Helped with the development and testing of the mobile application.
