WORK EXPERIENCE

AIA IT (M) SDN. BHD.

DevSecOps Engineer

Jan. 2026 – Present

Kuala Lumpur, Malaysia

- ❖ Designed, maintained, and optimized CI/CD pipelines using GitHub Actions to automate code integration, quality validation, security scanning, artifact management, and deployment workflows, improving delivery efficiency and reliability.
- ❖ Managed cloud-native infrastructure and deployments using Microsoft Azure, Azure Kubernetes Service (AKS), Azure Key Vault, Docker, and Helm across scalable enterprise environments.
- ❖ Strengthened application security and compliance by integrating Prisma Cloud, Veracode, and SonarQube into deployment pipelines, proactively mitigating CVEs and enforcing secure coding standards before release.
- ❖ Maintained and updated Alpine Linux 3.23-based Dockerfiles, handling minor version and dependency upgrades while ensuring compliance and platform security requirements were met.
- ❖ Utilized Nexus Repository Manager for centralized artifact storage and dependency management across multiple deployment environments.

Ryt Bank

Frontend Engineer

Apr. 2025 – Oct. 2025

Kuala Lumpur, Malaysia

- ❖ Developed and optimized fintech mobile applications with a strong focus on performance, usability, and feature reliability.
- ❖ Delivered 199+ commits within 3 months, contributing to key improvements across the bank's mobile platform.
- ❖ Built proof of concepts (POCs) for interactive graph visualizations, solving responsive layout challenges involving dynamic width and height.
- ❖ Developed reusable design system components to ensure consistent styling and scalable architecture across the application.
- ❖ Integrated analytics and user behavior tracking to support data-driven product decisions and feature enhancements.
- ❖ Collaborated closely with product managers, backend engineers, and UI/UX designers in Agile workflows to deliver production-ready features.
- ❖ Utilized React Native and Expo to ship scalable mobile solutions in a fast-paced fintech environment.

ON2IT SDN BHD

Software Development Engineer

Apr. 2024 – Apr. 2025

Shah Alam, Malaysia

- ❖ Developed and maintained enterprise-grade solutions for the GEBME project, enhancing both the admin portal and point-of-sale (POS) system.
- ❖ Implemented and optimized core functionalities using Spring MVC, Java, AngularJS, and HTML to improve responsiveness and usability.
- ❖ Led CI/CD pipeline setup and deployment processes for the POS system, improving release efficiency, scalability, and deployment reliability.
- ❖ Executed end-to-end implementation, testing, and rollout of the GEBME POS system across multiple environments with a strong focus on uptime and fault tolerance.
- ❖ Worked closely with cross-functional teams using Agile/Scrum methodologies while managing tasks and sprint progress through Jira.

- ❖ Collected and analyzed user feedback to drive iterative improvements that enhanced operational efficiency and overall system usability.
- ❖ Successfully delivered and deployed critical features on schedule, contributing to operational success across multiple deployments.

Dell Technologies

Aug. 2023 – Nov. 2023

Undergraduate Intern

(Remote) Cyberjaya, Malaysia

- ❖ Resolved network outages by conducting root cause analysis and implementing corrective actions as part of the Infrastructure Incident Management team.
- ❖ Used ServiceNow, Cisco, and NetBrain to track, manage, and resolve incident tickets while maintaining compliance with operational protocols.
- ❖ Collaborated with global networking teams to improve infrastructure monitoring and SSH access reliability.
- ❖ Contributed to internal process improvements by testing and monitoring the GNO Dev Portal using WinSCP and PuTTY.
- ❖ Created internal documentation and support resources to streamline troubleshooting and team operations.

EDUCATION

Swinburne University of Technology (INTI International College Subang)

December, 2023

Bachelor of Computer Science (BCSSUT), Major (Computer Science)

Subang Jaya, Malaysia

- ❖ Built a full-featured shopping platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- ❖ Developed item sorting features based on category and pricing to improve user experience and usability.
- ❖ Active member of the TableTop Society, fostering teamwork and strategic thinking.

PROJECTS

INTI CarPark (Java, Android Studio, Firebase)

- ❖ Developed a car park reservation system with real-time updates, notifications, and a user-friendly mobile interface.
- ❖ Integrated Firebase for database management and live synchronization.
- ❖ GitHub: MPB2000/INTICarPark

StarlingRNFAApp (Java, Android Studio, MySQL, phpMyAdmin)

- ❖ Built a restaurant table reservation application with catering order support and feedback management.
- ❖ Integrated backend functionality using MySQL and PHP APIs.
- ❖ GitHub: Hawwa11/StarlingRNFAApp

Shopbuddies (MERN Stack - MongoDB, Express.js, React.js, Node.js)

- ❖ Developed an e-commerce platform featuring category-based sorting, shopping cart functionality, checkout flow, and admin product management.
- ❖ Focused on responsive UI development and usability improvements.
- ❖ GitHub: MPB2000/shopbuddies

GEBME Web Portal (Spring MVC, AngularJS, Java)

- ❖ Developed and enhanced a web portal for menu management with role-based access control and

dynamic UI components.

- ❖ Supported backend integration and contributed to mobile application testing and feature validation.
- ❖ Website: <https://my.gebme.app/>

SKILLS & INTERESTS

- ❖ **Languages & Frameworks:** TypeScript, JavaScript, React, React Native, Expo, Java, Python
- ❖ **Databases & Backend:** MongoDB, Firebase Realtime Database, MySQL
- ❖ **Cloud & DevOps:** Azure Kubernetes Service (AKS), GitHub Actions, Docker, Helm, Nexus Repository Manager, CI/CD Pipelines
- ❖ **Security & Quality Tools:** SonarQube, Veracode, Prisma Scan
- ❖ **Tools & Platforms:** GitHub, Jira, Android Studio, Visual Studio Code, ServiceNow
- ❖ **Methodologies:** Agile/Scrum, CI/CD, Incident Management
- ❖ **Areas of Interest:** Full Stack Engineering, Mobile App Development, Fintech Solutions, Scalable Application Architecture, Cloud & DevSecOps Engineering
- ❖ **Extracurricular Activities:** Gym, Travel & Photography, PC Gaming, Cooking
